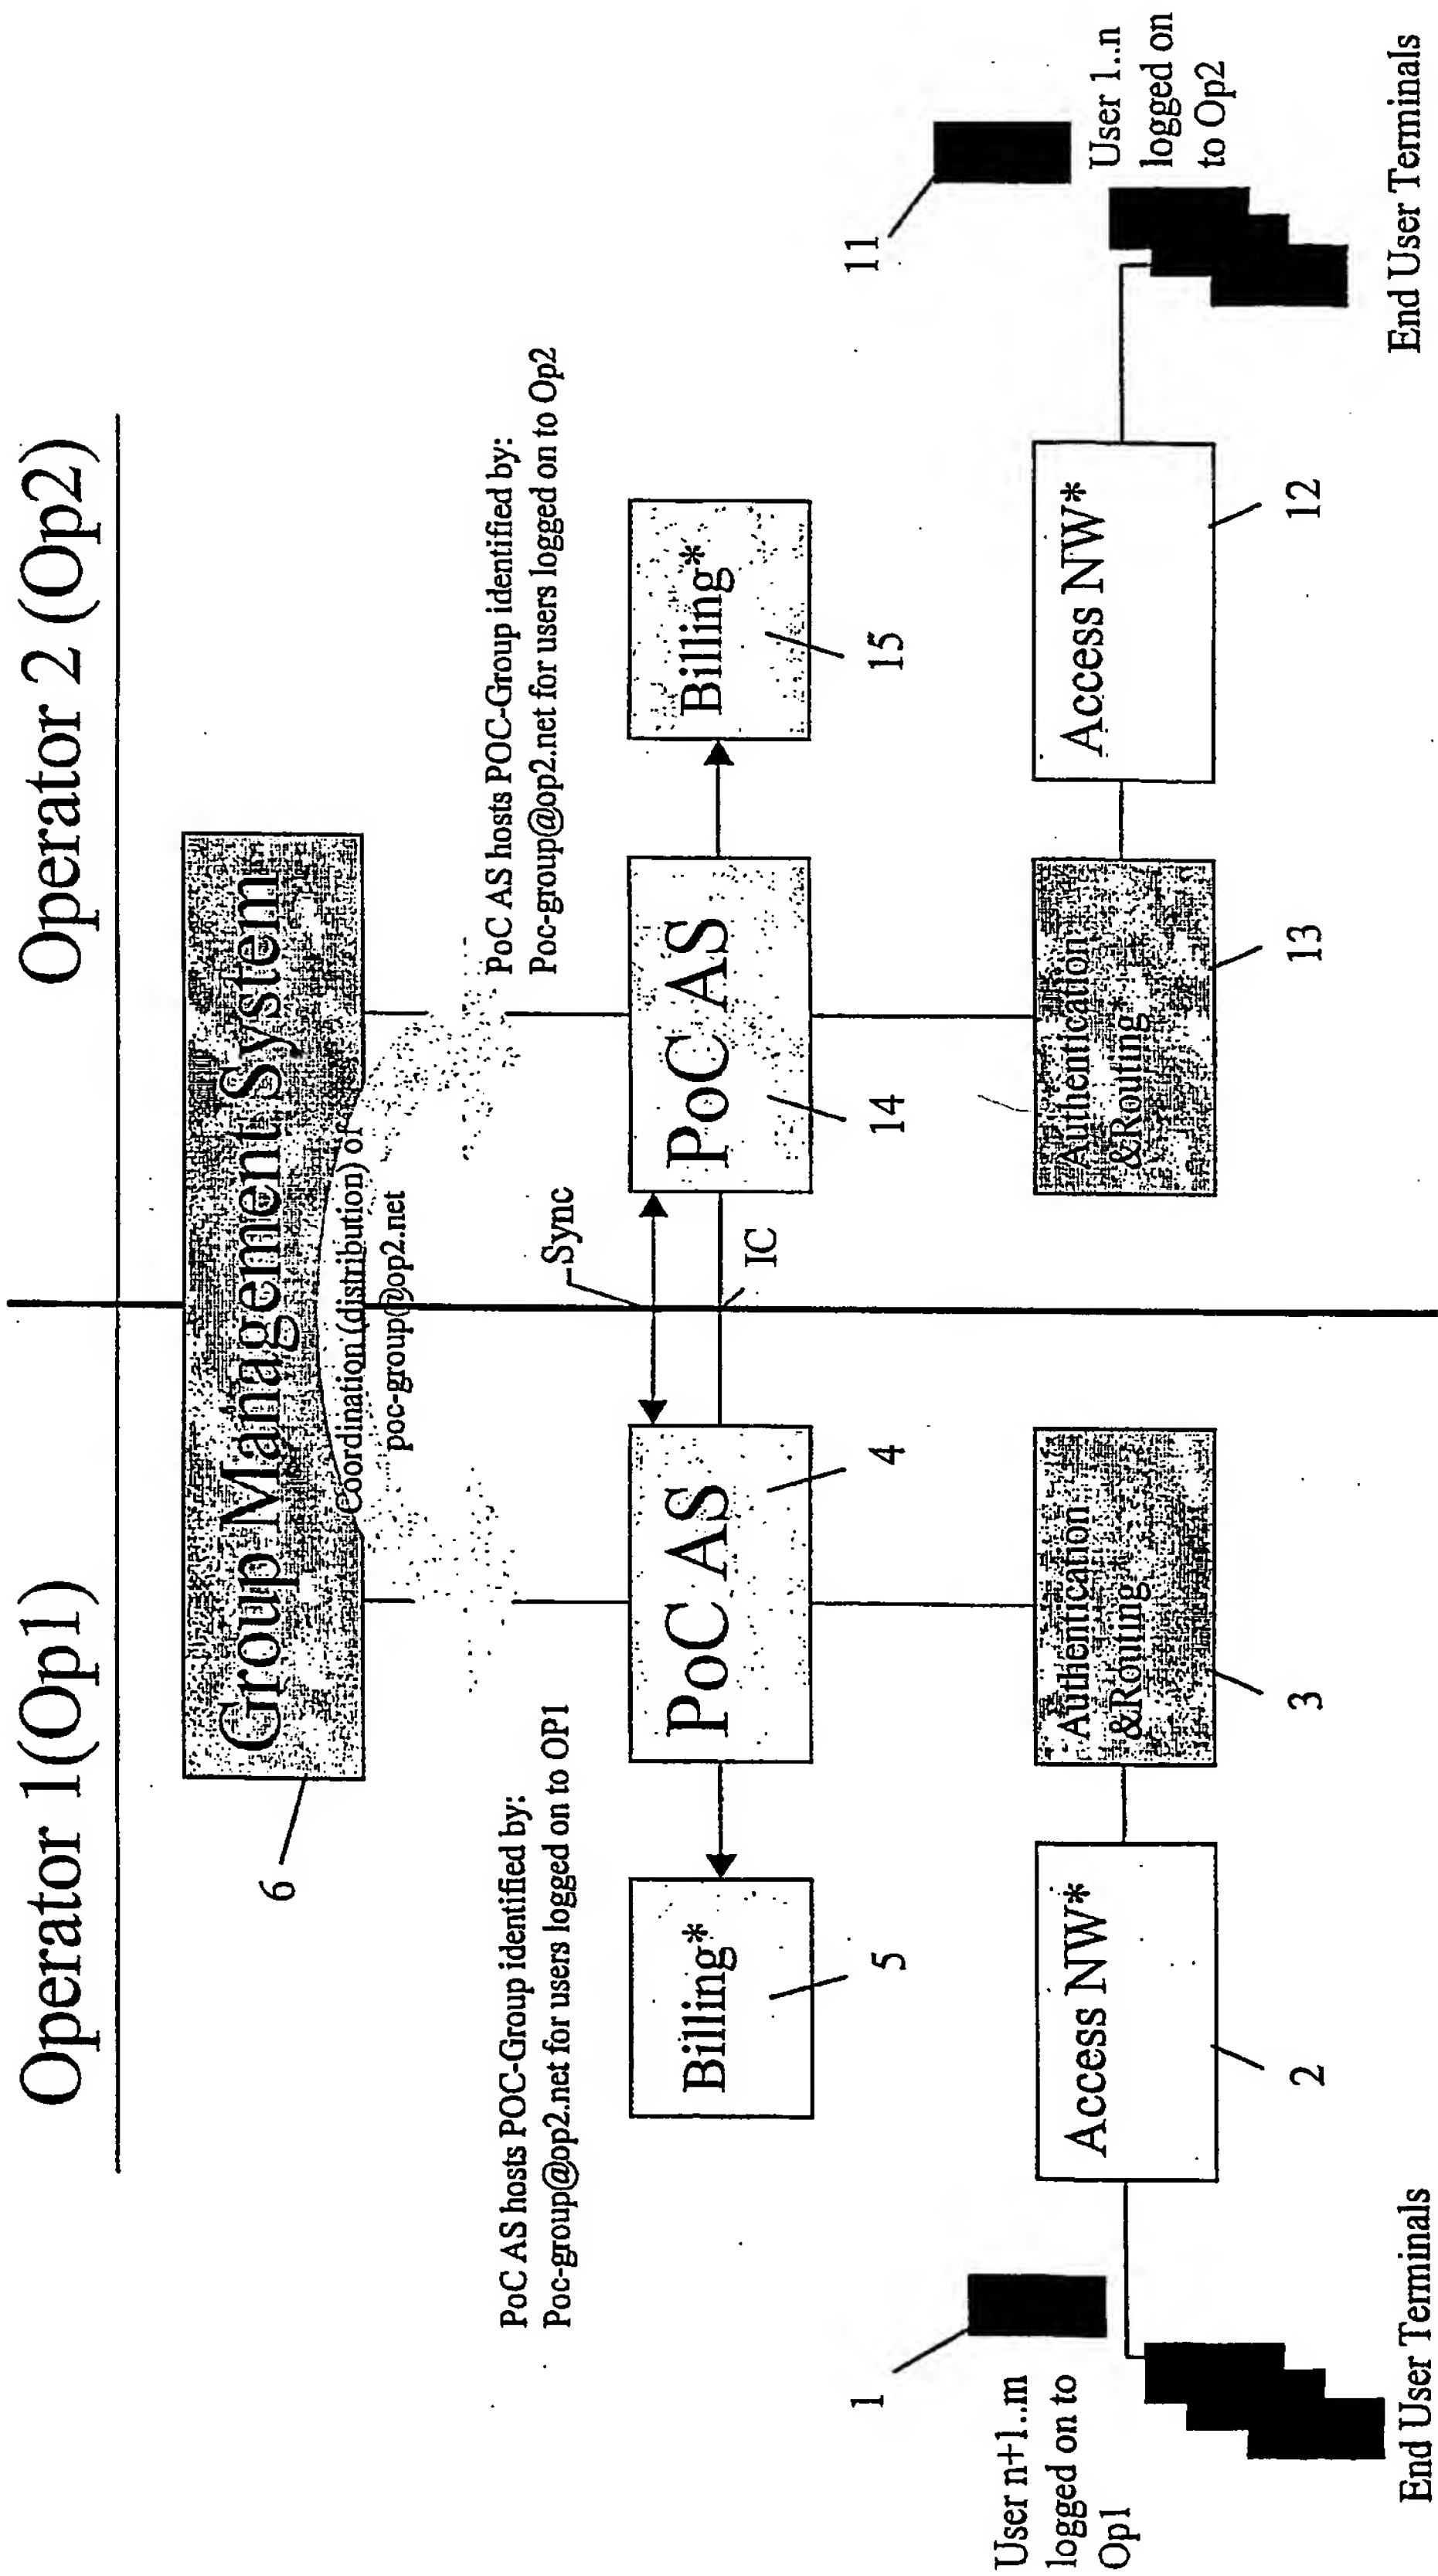

Fig. 2

## Operator 1 (Op1)

PoC AS acts as proxy for individual users logged on to Op1  
 using [poc-group@op2.net](mailto:poc-group@op2.net)

## Operator 2 (Op2)

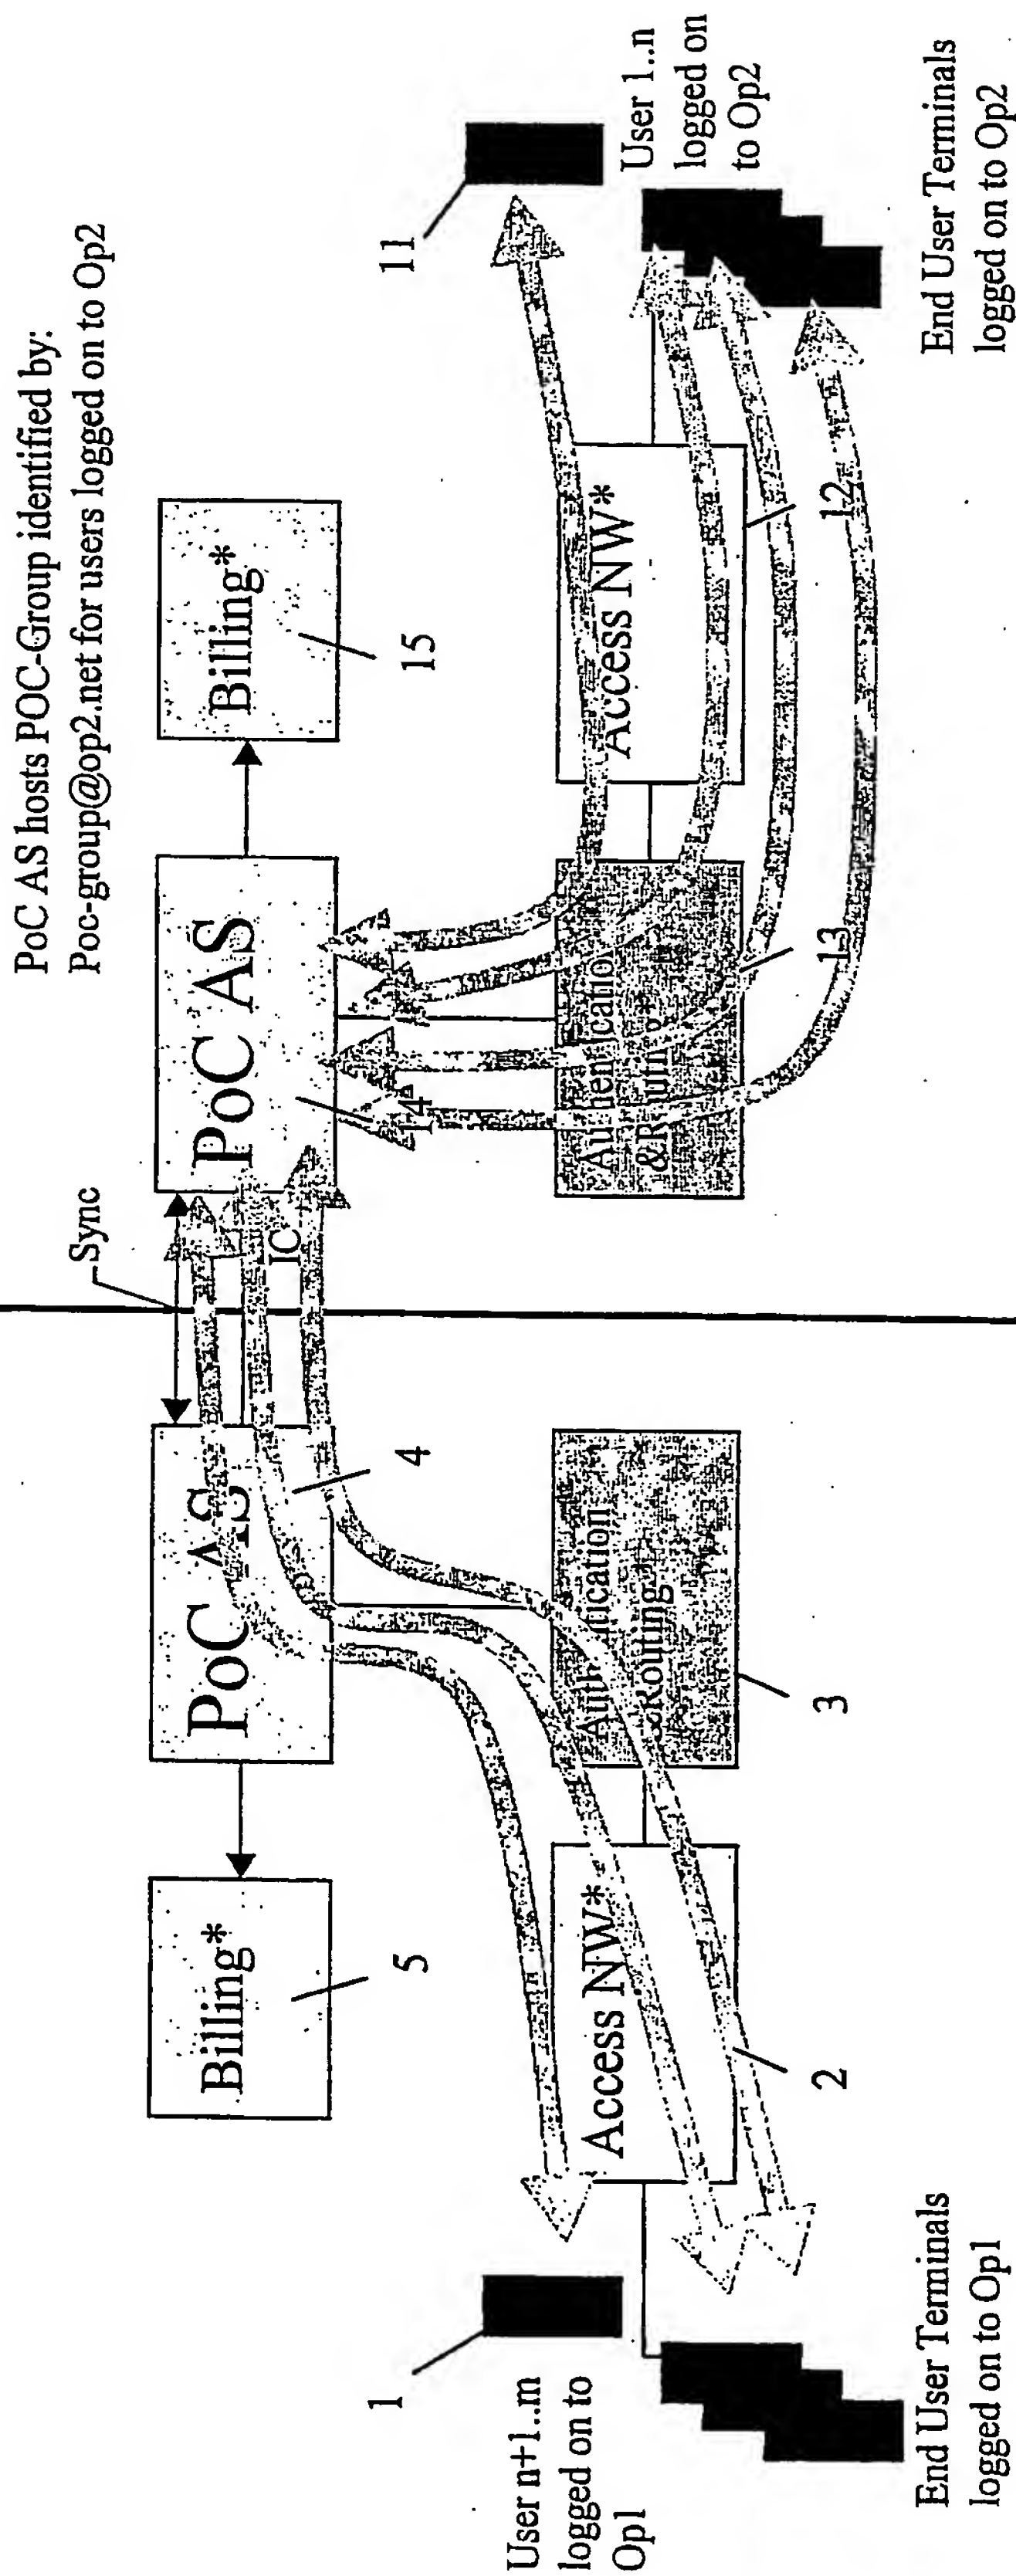

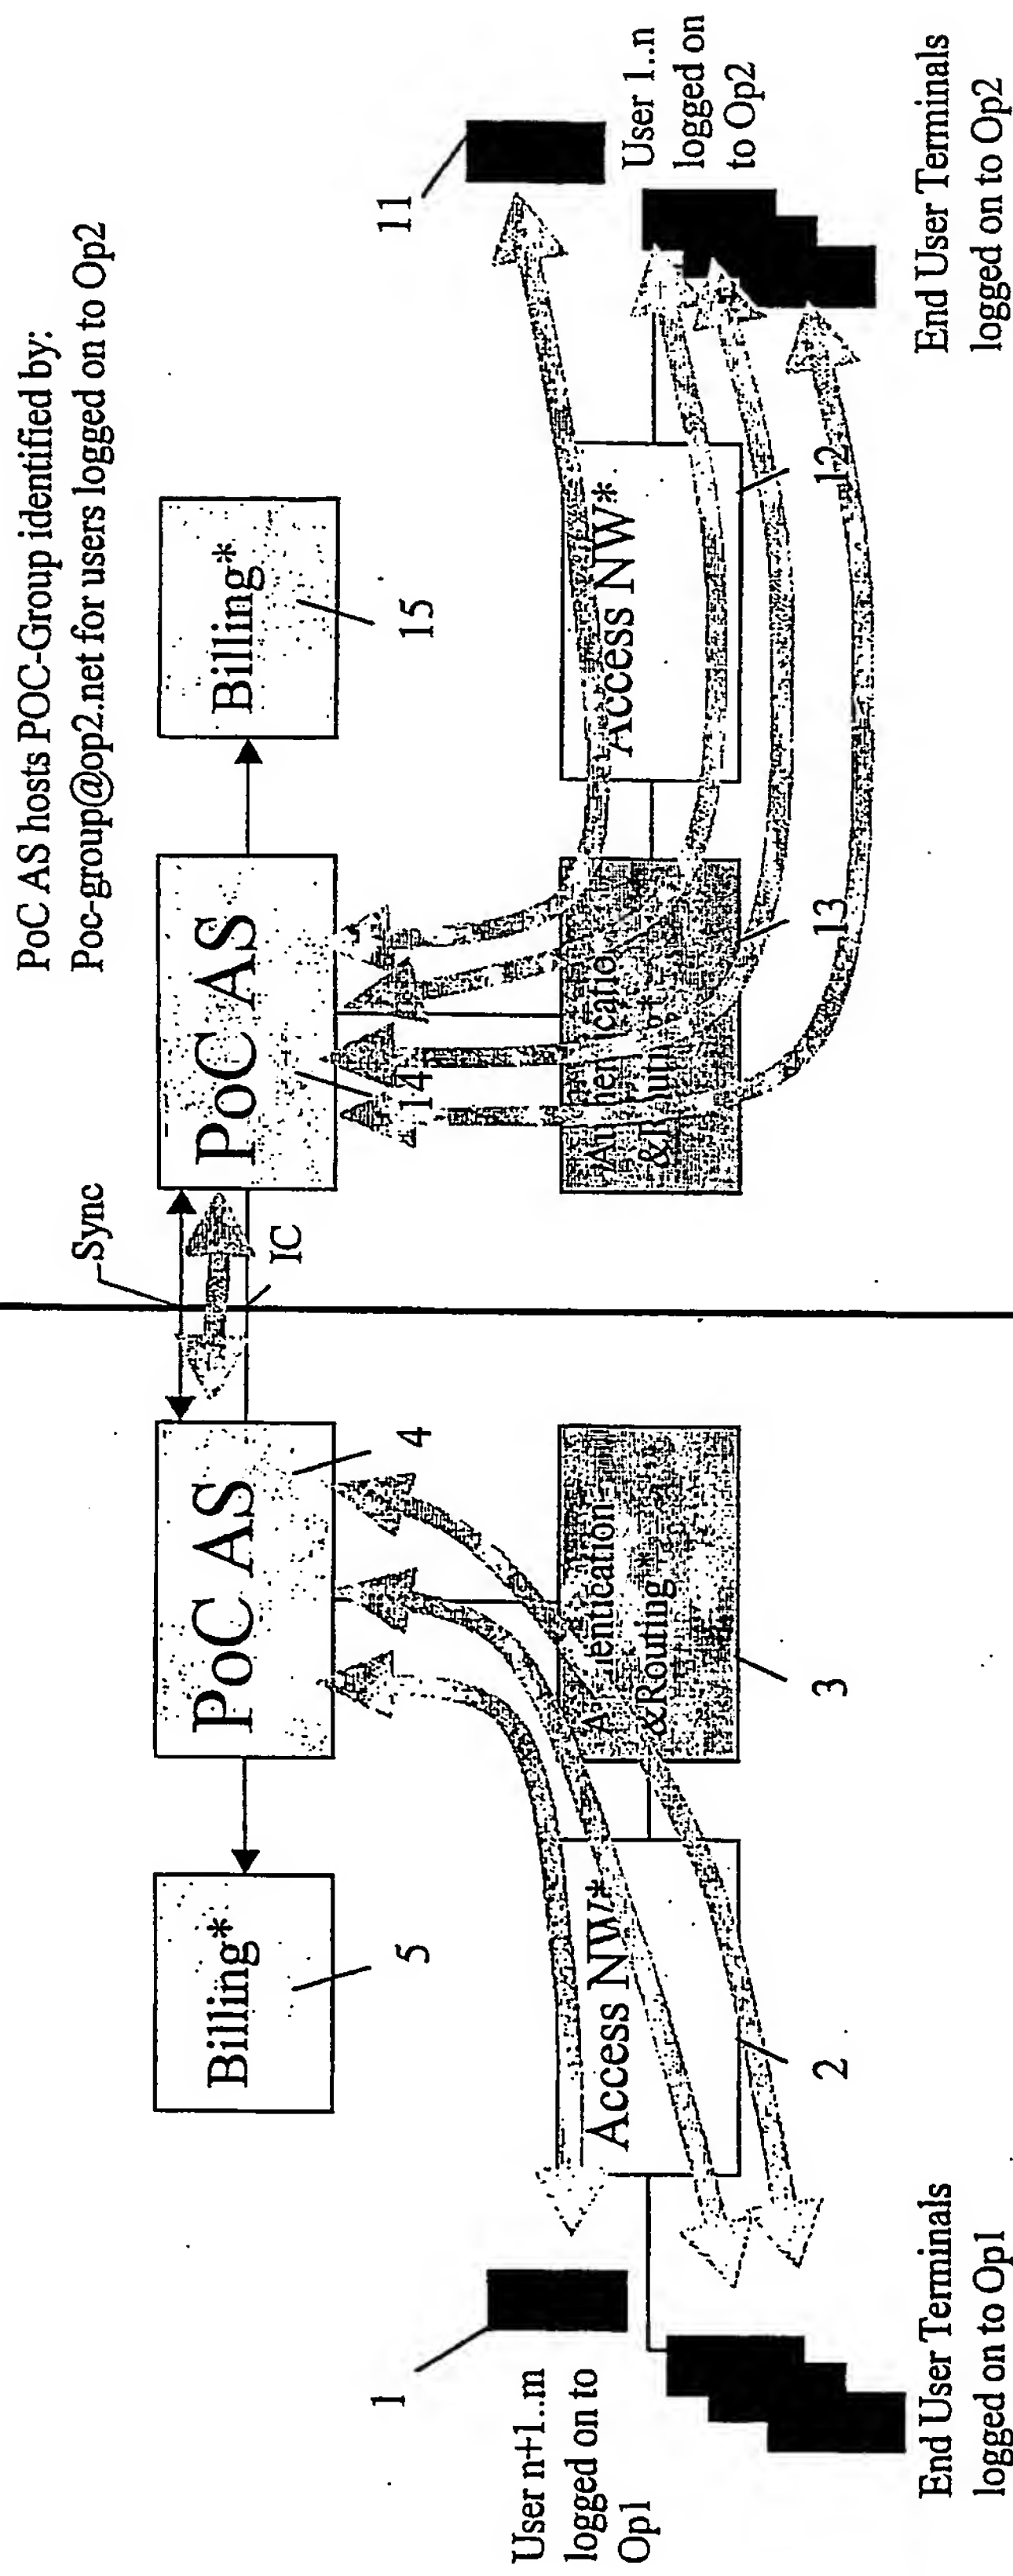

Fig. 3

\*: Optional components

## Operator 1(Op1)

The PoC AS hosts POC-Group identified by:  
poc-group@op2.net for users logged on to Op1  
(partial PoC-Group proxy)

## Operator 2 (Op2)

\*: Optional components

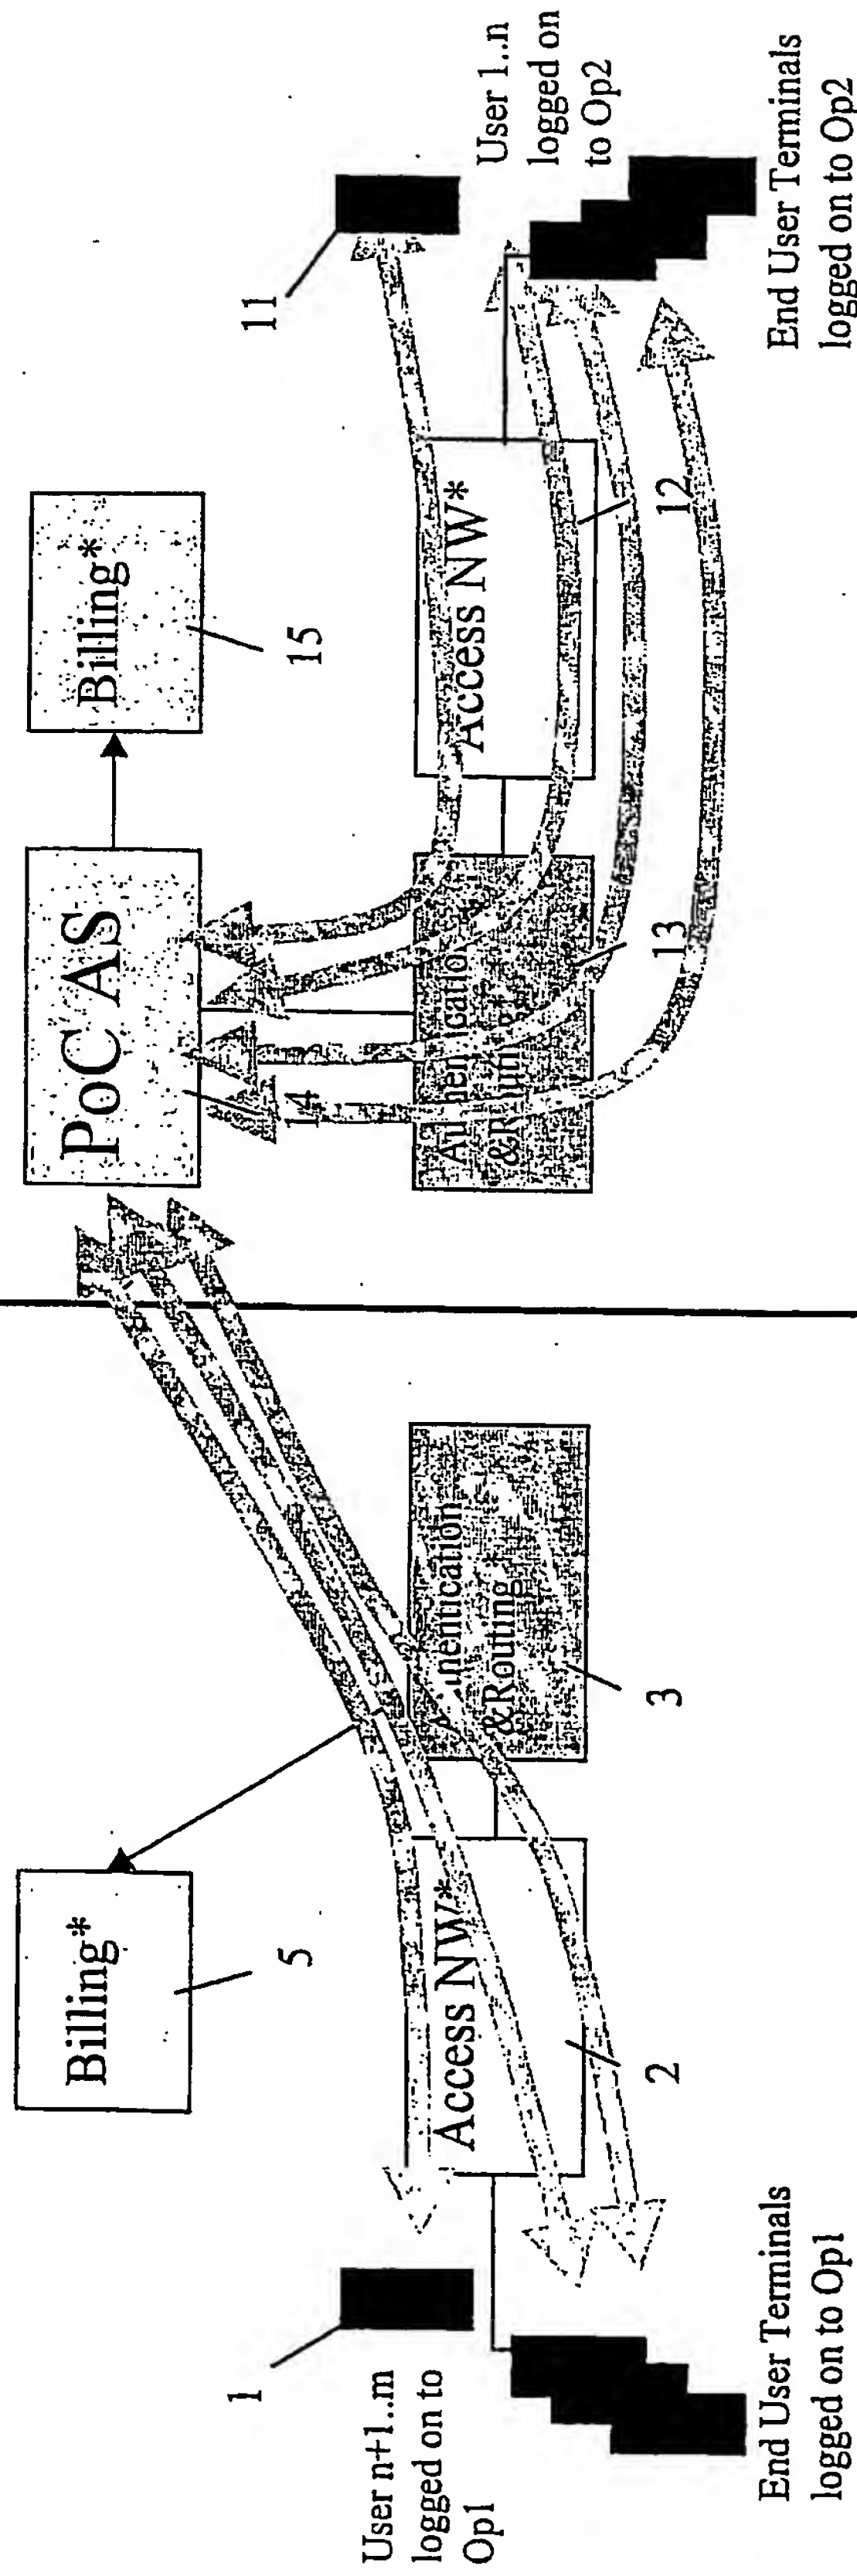

Fig. 4

## Operator 1 (Op1)

Op1 does not offer POC-Groups:  
 users logged to Op1 belonging to poc-group@op2.net are  
 routed directly to PoC-AS of Op2

## Operator 2 (Op2)

PoC AS hosts POC-Group identified by:  
poc-group@op2.net for users logged on to Op2

\*: Optional components
